## Testimonials

- Dr Khan is an excellent teacher and if we have one like him in each deanery then I am sure quality of radiology training will certainly go extremely high (UK).
- This is the first session I joined and I must say it is an incredible learning opportunity for me. The viva format really pushes trainees into the learning zone and enhances learning. Also the cases are so good, I have definitely seen some things for the first time (Australia).
- I have not seen a course like this before; absolutely thorough and covers everything from basics to advanced which most courses do not. This kind of teaching should be happening in every deanery, and if implemented correctly the pass rate for exams would definitely increase. Not everyone is good at reading from books or may not have the right environment to study at all times but this kind of dedicated session where we are involved for a set number of hours helps tackle this (UK).
- You are doing a great service to medical education in general and radiology trainees in particular!!!! Please keep doing it as no one else does it so nicely and that too without any monetary benefit!!! Hats off to you.
