Testimonials

- The presentation was well organised, clear, with excellent diagrams and clear explanations. I particularly liked the variety of interesting cases which Dr Farrugia has collated and shown in her presentation. She showed the cases using a multimodality format, first on x-ray and then cross-sectionally on CT and PET so we could get an appreciation of the 3D anatomical location and correspond to the x ray findings. No doubt this presentation took a painstaking amount of time to do, and it is very much appreciated. Dr Farrugia is very knowledgeable, patient, friendly and answered all questions well. Pace was perfect- not too fast, allowed us to absorb what she was saying and to take notes. All content covered was relevant to clinical practice and also for 2B exams" (UK).
- "Excellent. Very thankful for all the hard work! Tonight's tutor has a great style of teaching that is easy to follow!" (UK).
- Great overview of the last few weeks sessions. Great systematic approach applied to plain film reporting. Has definitely progressed my knowledge and understanding in this area (UK).
- Excellent presentation (Kenya).
- Great session, it was a good review and definitely learned new things, thank you (UK).
- Fantastic lecture!!! Really enjoyed it the best part was the pleural pathology (UK).
- Very useful cases and well explained (UK).
- Brilliant session. Cases very well explained and a great depth of material (UK).
- Everything was really good (UK)
