- Like everyone else I am forever grateful for these Sessions however, I am finding it very difficult to catch every one of them, I missed most of the bone sessions because of on call commitment. I have tried logging on from work when this happens but unfortunately it's impossible to make any benefit of the session while on a busy On call. Would it be possible at all to make the recordings available to SPRs? I am happy to pay to re watch them if that could be an option. As always thank you so much (UK).
