Testimonials

- I liked everything. A thorough insight into how to approach MRI Hip! Dr. Babar is an amazing teacher who is able to explain concepts in a calm, collected and easy to understand manner! Thank you! (UK).
- Absolutely loved this lecture ! Mentioned the core stuff and cases were so well explained. I feel like I remembered everything you said, you captured my attention. I like your concise style if teaching with the subtitle hint of detail but great emphasis on the things we should not miss ! Superb 10/10 (UK).
- Sublime, can't thank Dr. Khan and team enough for these highly relevant lectures. Nobody else in the whole UK is doing such an immense undertaking. They really need a knighthood or some financial recognition from NHS for the amazing work they do to train radiologists. Fantastic work (UK).
- Very good lecture, with well-balanced distribution of theory and case review. Thank you for the cases and detailed explanations to solidify the knowledge (UK).
- Great and informative lecture (Kenya).
- Excellent academic teaching program ever (Algeria).
- "Extremely knowledgeable session Great thanks from my heart" (Sudan).
- The lecture and viva was useful. Dr. Babar is a great MSK teacher. Very interesting (UK).
- Excellent and very in depth. Some aspects of hip MRI felt sub specialist in a viva setting (UK).
- Best for all radiology resident (Pakistan).
- Excellent and more than this is at No COST (Saudi Arabia).
- Very good session, dedicated teacher with good teaching points and conceptual talk (Pakistan).
- Excellent teaching from Dr. Babar once again. Very engaging (UK).
- It was best (Pakistan).
- The tendons study around the hips I would say! I never really understood before (UK).

Session 2.12 MSK MRI for FRCR 2B: (a) How to report MRI hip (b) Exam cases viva

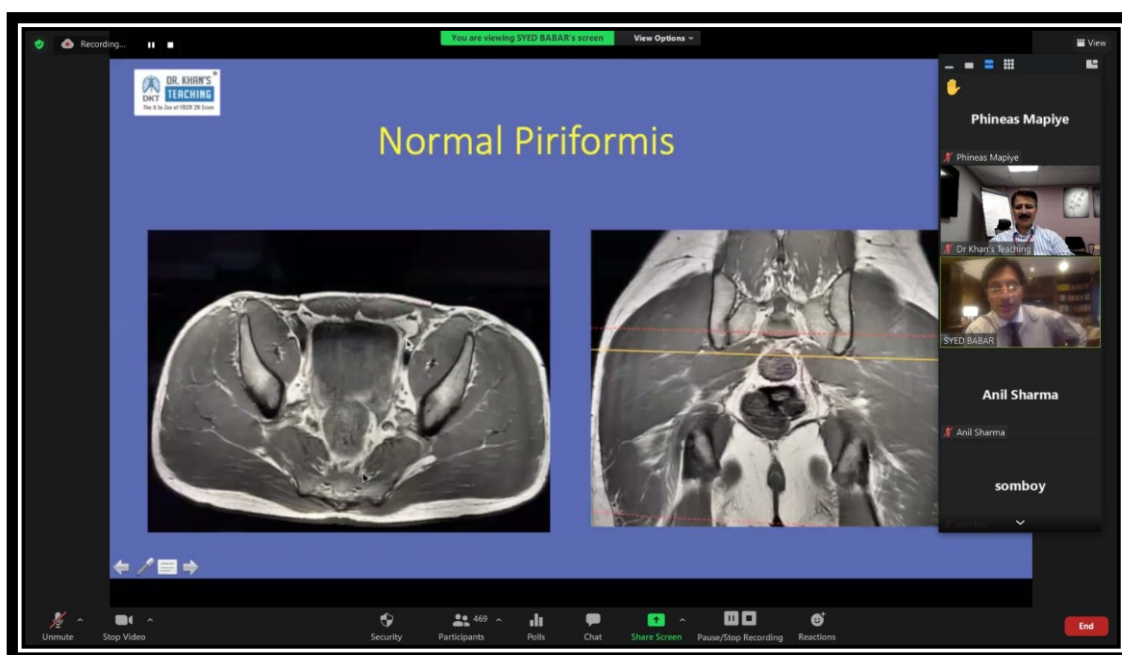

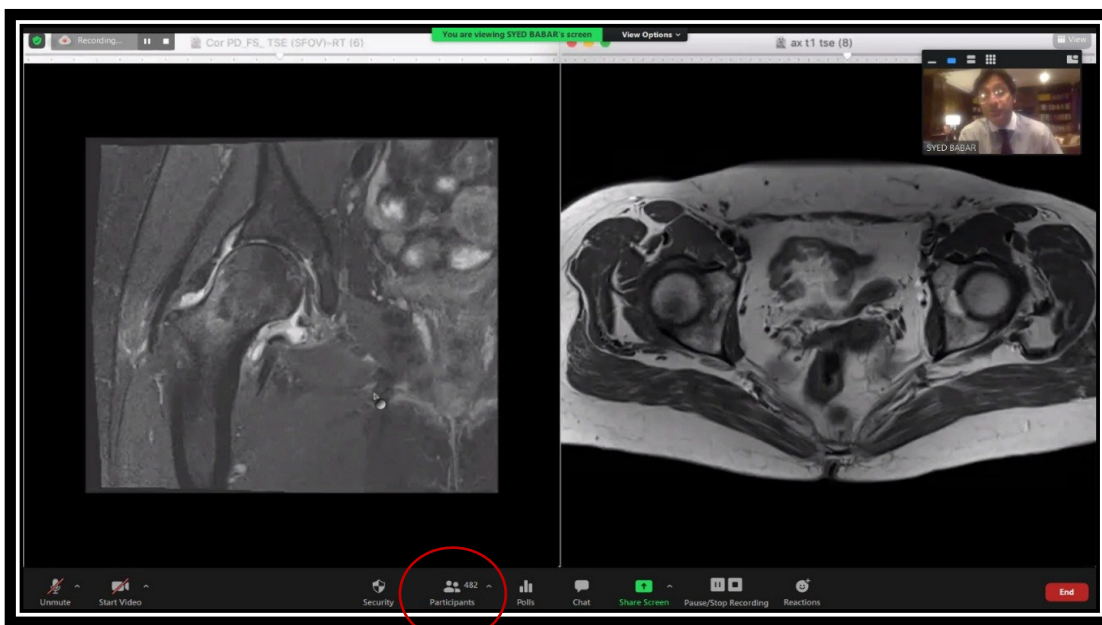

- As a radiology aspirant, I found this session to be extremely enlightening and encouraging. I cannot wait to start my radiology training and make the most of DKT to progress further in my career (UK).
- I really liked how the VIVA cases shown in the final hour of the lecture were the same diagnoses as what was discussed earlier in the talk, e.g. gluteus medius tendon tear. This helped to consolidate my knowledge and recap those important points which were covered in the theory session (UK).
- Well prepared cases by Dr. Syed Babar. Candidates also did very well. Looking forward to more sessions (India).
- Clear and concise, I liked the structure and the explanation were excellent with lots of clinical and 2b correlates. Giving insider 2b advice was really useful! (UK).
- Very professional and succinct. Great presenter. Hope to hear more from him soon (UK).
- It's excellent (India).
- Fascinating lecture content and presenter. Thanks to Dr. Babar and Dr. Khan (UAE).
- Great (Pakistan).
- Very helpful for reporting. Discussed in details (Pakistan).
- Awesome (Saudi Arabia).
- Very good approach (Pakistan).
- Excellent and amazing (Malaysia).
- "Excellent sessions arranged by Dr. Khan. Excellent talk by Dr. Babar. The viva cases really enable us to broaden our vision for picking pathologies" (Pakistan).
- Really enjoyable session. Thank you! (UK).
