  34. Turkey
  35. UAE
  36. United Kingdom
  37. United State of America
  38. Yemen
  39. Zambia

### **Some Selected Feedback Quotes:**

- Simply brilliant. The examiners are taking their own time in doing this and providing this teaching for free. Such benevolence in the UK is non-existent! Teaching in training schemes are variable, some with excellent teaching, some patchy. DKT will benefit everyone particularly those with less support from the training scheme (UK).
- The detailed explanations to cases, really good mix of cases, emphasising the key points not only for exam but that which is relevant to daily practice, allowing candidates the time to say what they think on a non-judgemental platform. Above all, having the passion to deliver excellent teaching to future radiologist free of charge is a big thing in itself. Unfortunately, other general courses and those including exam preparation courses I have personally found are on paid subscriptions but the quality is nowhere as good as this course. A huge amount of effort has been put in by the entire faculty which is appreciated beyond words (UK).
- Nobody else is doing what Dr Khan and his team are doing. Don't have words to explain our immense gratitude for all your kind efforts and encyclopaedic wisdom (UK).
- Thank you very much for this teaching. It has really helped us prepare for the exam. If we pass it will be down to you (UK).
- This has been the most fantastic learning resource in my preparation for 2b. I had not missed a session since learning about this from a colleague. The quality of the teaching is consistently at such a high standard. I have recommended this learning resource to the rest of the trainees in my deanery. It's useful for all stages of training. The teaching on these sessions is truly exceptional. I can't thank you enough (UK).
- This course has hugely impacted my preparation and allowed me to understand many concepts and more importantly see loads of cases. It was not only useful for exam but also for my day to day practice. I am grateful for your efforts, thank you very much (UK).

## Full Course Feedback - FRCR 2B Autumn 2021 Exam Teaching

- The interactive sessions with the lecturers as well as listening to the candidates and learning from their mistakes, furthermore it is excellent that Chapman is always used as the reference material for teaching, it helps to enhance retention and understanding (Nigeria).
- This course is very valuable and I recommend, its teaching is very systematic (Egypt).
- The authenticity and perfection in design and execution of each session was excellent (India).
- The interactive nature of the course makes it easy to follow and maintain attention (Nigeria).
- Crystal clear concepts of each case, clinical oriented sessions (Pakistan).
- Keep it up Dr Khan and his marvellous team. If I pass IA I owe a lot to you and your team (Pakistan).
- It is the best course, I would recommend to everyone (Pakistan).
- The best-ever quick course before exam (India).
- Almost everything was great about this course, amazing sessions with good cases, a lot of learning points regarding both exams and clinical practice (Pakistan).
- Amazing collection of cases, great teaching with exam tips, very relevant to FRCR 2b exam prep (Pakistan).
- Systematic comprehensive overview of topics. High lighting the clinical relevance of certain bits of complex anatomy. Highlighting key differentiators between certain conditions that can appear similar (UK).
- Clear basic concepts, We also got an idea of what are the type of cases that might appear in exam, as we are not aware of these in overseas countries (India).
- Exam cases, viva tips, radiological normal as well as pathology appearance and what not (Pakistan).
- Covers most of the curriculum in an engaging way with combination of lecture and case based/viva teaching (UK).
- The timing of the sessions was great - evenings - allowing me to revise during the day and attend these sessions in the evenings. The length - 3 hours - was also great allowing us to cover a lot of the syllabus. High quality teaching, highly relevant to the exam, vast number of cases, great tips, viva simulations in the exact same format of the exam so we know what to expect. All free of charge (UK).
- It has been invaluable, Dr Khan (and colleagues) has demystified so many difficult concepts which I have struggled with for many years. I feel more confident about how to present, and how to tackle the rarer/syndromic cases which we don't get shown in our Trust viva practices (UK).
- I will be more confident when handling cases (Kenya).
- Put me on the right track (Egypt).
- Very good impaction on our preparation. This course gave us a systematic way to prepare for the exam (Pakistan).
- It exposed me to lots of cases, including cases I do not get to see much of in my usual practice. The explanation of the findings were thorough and has helped me prepare adequately for the exam (Nigeria).
- Very helpful...Boosts up confidence and gives a gist of UK training esp for non UK candidates (India).
- It has taught me how to present a case during the viva, It has taught me to follow a systematic approach while tackling a case. To have differential diagnosis relevant to the particular case. To speak on any pertinent negatives. All in all an exam tailored course which has been invaluable to tackle FRCR 2b (Kenya).
- Helped me immensely and instill confidence in me to face FRCR 2B exam (India).
- I have learned a phenomenal amount. Too much to even begin explaining. Every session has been such a great learning experience (UK).
- As my training is from Pakistan so this course is helping how to take case in FRCR (Pakistan).

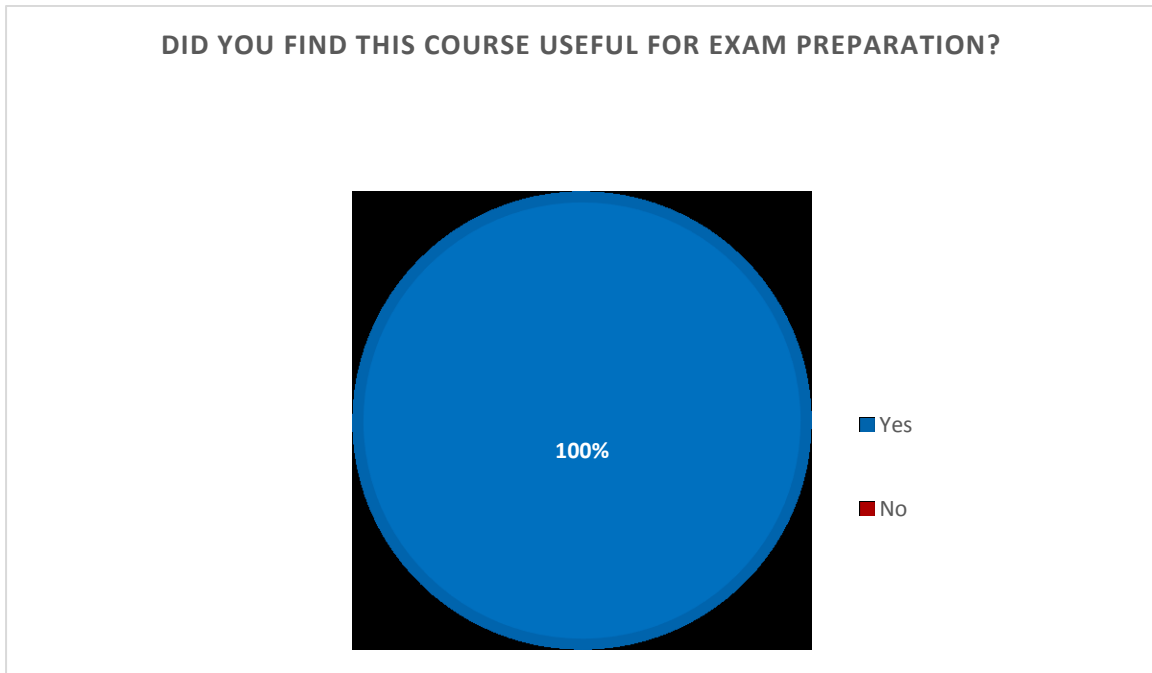

## Full Course Feedback - FRCR 2B Autumn 2021 Exam Teaching

- This course has helped me a lot in learning Radiology though I have not given any FRCR and I am planning to give RANZCR. I am hoping the teaching by Dr Khan will definitely help me at some point of time during my RANZCR exam (India).
- It had made me very interested in giving FRCR exam as I'm planning now to go for it whenever given the chance as covid problems are delaying it (Pakistan).
- Feel more confident having seen so many more cases alongside consultants explaining the key findings, and their significance (UK).
- I am more familiar with description and approach of exam cases by trainees from different countries and what is expected from a 2b candidate (Pakistan).
- It has given me insight into Radiology learning (Pakistan).
- It has helped me to become confident and become a good and safe radiologist (UAE).
- It's just extremely helping for my preparation for exams as well as training (Nigeria).
- It help me a lot with preparation and over all understanding of radiology. Sir u made radiology palatable (Pakistan).
- It means a lot , excellent very outstanding course by best teachers in the world especially Dr Khan (Pakistan).
- Given me true understanding of how exam operates and what the RCR is looking for in candidates (UK).
- It is a very great initiative, as a student I feel this approach of A to Zee series is very great way of covering the most important topics (UAE).
- Excellent course organisation and structure. The viva sessions were really well coordinated. Great communication with the candidate pool through the use of WhatsApp. Excellent structure in creating candidate lists and giving everyone a chance to participate (UK).
- Loved every aspect of the course. Was lucky enough to attend most of the sessions. Very helpful indeed (UK).
- It's flawless (Pakistan).
- Loved it! (Myanmar).
- Perfectly organised. A dream came true (Pakistan).
- Phenomenal (UK).
- This is very inspiring and helpful especially in COVID times (Pakistan).
- It's the best I have ever seen in radiology teaching. It should be encouraged (Nigeria).
- It has been an outstanding course. Amazing effort by whole team (Pakistan).
- No words for this! It's excellent (Pakistan).
- It was wonderful (Pakistan).
- One of the best course I ever attended (Pakistan).
- I love Dr Khan and his teaching. Anjali is just exceptional same goes for Bhavin and Sayed. These are great teachers. The others are equally excellent. I wish we can have more of these teachings (Nigeria).
- Thank you! it's a great help for radiologists who trained in resource limited countries (Kenya).
- Please keep this running for free for as long as you possibly can! My colleagues and I will definitely contribute to your program when we become consultants and have some expertise. I am sure everybody who benefits from your teaching feels the same way (UK).
- Hats off to the DKT team for doing such amazing sessions. They have made me a better radiologist (Pakistan).
- Appreciative of this magnanimous gesture to teach us without charging a dime. Thank you (South Africa).
- It is the best teaching program so far. Thank you Dr Khan and his team (Pakistan).
- Marvellous (Pakistan).

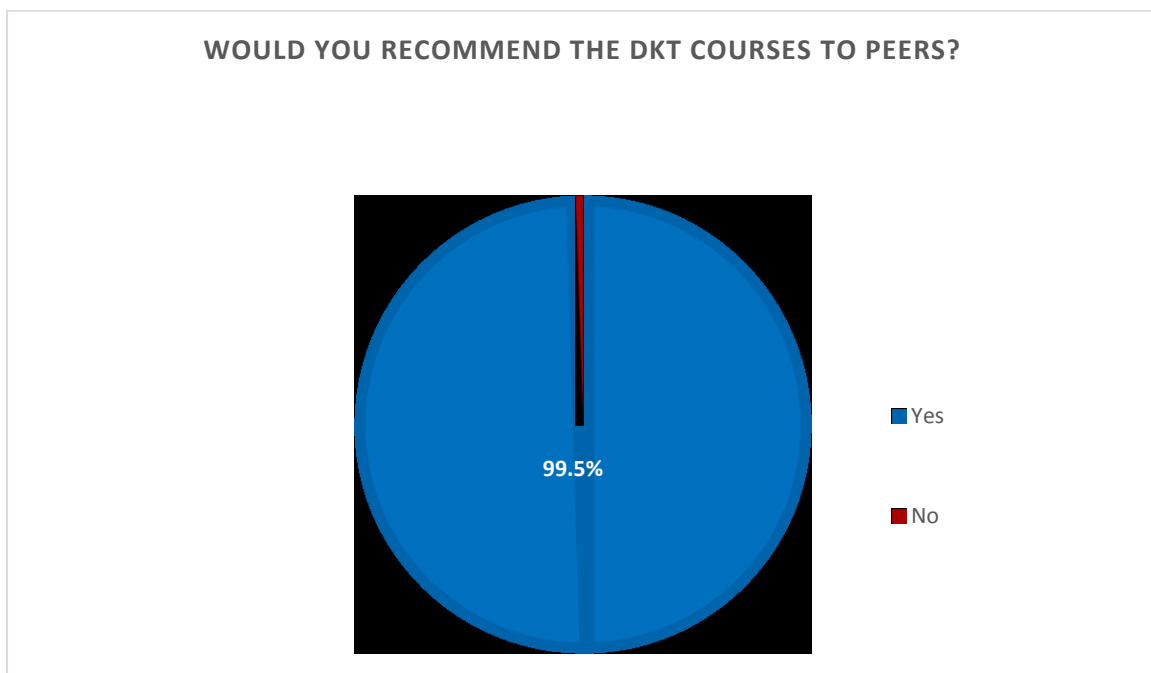

## Full Course Feedback - FRCR 2B Autumn 2021 Exam Teaching

- I would like to say a big thank you for the teaching and feel very privileged to learn from you all amazing teachers (UK).
- Thanks for the great effort, Legendary team of teachers! (UK).
- Extremely grateful that Dr Khan and team has spent so much time and effort to provide such high quality teaching (UK).
- Thank you for all your effort that too free of cost for students like us it is a boon. Thanks (UAE).
- It was a pleasure listening to Dr Khan each day. I am sure this course had benefited every one of us (India).

### 1. Did you find this course useful for exam preparation?

### 2. Would you recommend the DKT courses to peers?

### 3. What aspects of the course were most useful or valuable?

- The detailed explanations to cases, really good mix of cases, emphasising the key points not only for exam but that which is relevant to daily practice, allowing candidates the time to say what they think on a non-judgemental platform. Above all, having the passion to deliver excellent teaching to future radiologist free of charge is a big thing in itself. Unfortunately, other general courses and those including exam preparation courses I have personally found are on paid subscriptions but the quality is nowhere as good as this course. A huge amount of effort has been put in by the entire faculty which is appreciated beyond words (UK).
- The interactive sessions with the lecturers as well as listening to the candidates and learning from their mistakes, furthermore it is excellent that Chapman is always used as the reference material for teaching, it helps to enhance retention and understanding (Nigeria).
- I found the viva sessions particularly useful as it allowed me to understand how to present a case. Excellent teaching sessions given by all lecturers and faculty (UK).
- The selection of topics and the teaching is very exam friendly. Thank you for all your efforts (UAE).
- Dedicated Faculties, well formulated teaching, To the point discussion with basics & recent advances; moreover IT IS FREE OF COST (which really matters for South Asian countries doctors); Worthy Respected Sir Dr Sami Khan is a blessed teacher for us all (Pakistan).
- Absolutely every session has been vital, I especially liked the dicom cases with explanation of model answers by the examiners following the case. Dr Khans CNS top tips was also a highlight of the course, as were the gyne and paed sessions (UK).
- Case examples in each session are useful for daily work/reporting (Malaysia).
- Extensive, on point, free, online teaching (Pakistan).
- Interesting cases treated on Dicom and Pacs image with experienced radiologist which we do not have all of us this privilege. Recall of anatomy and repetition. Correlation anatomoradiology. Oriented question for candidates help us see how to approach and think about differential to get to possible diagnosis (Algeria).
- This course is very valuable and I recommend, its teaching is very systematic (Egypt).
- The authenticity and perfection in design and execution of each session was excellent (India).
- Useful tips and differential diagnoses shown. Liked how cases were categorised and shown (Singapore).
- Very good case selection, method of teaching is excellent (Pakistan).
- Each and every session was useful and amazing.
- All, Variety of cases, their presentation on various modalities, viva tips (UAE).
- All most all of session are useful (Sudan).
- Teaching in depth and wide (India).
- All the course is useful (Iraq).
- Mixed of viva and didactic lectures. Tips and hints. Seen important cases that may not be covered on day to day reporting (UK).
- The tips were helpful (South Africa).
- Seeing many cases in one sitting from each subspeciality (Kenya).
- Mini A-Z where there is structured explanations as go through (UK).
- Very interesting and challenging cases (UK).
- Superb Teaching by superb teacher (Pakistan).
- Every aspect was excellent (India).
- Great session (UK).

## Full Course Feedback - FRCR 2B Autumn 2021 Exam Teaching

- The most useful aspect was the A to Z course showing all the relevant exam scenarios in a particular module (UK).
- Case based learning, Tips for exams, Focus on common things, Differential diagnosis based tackling of cases, Systematic approach to tackle a case (Kenya).
- Case variety and teaching method (India).
- The interactive nature of the course makes it easy to follow and maintain attention (Nigeria).
- Whole pattern of teaching is very useful especially viva sessions and a to zee sessions (Pakistan).
- The speaker (Saudi Arabia).
- Style of presentation (Oman).
- Crystal clear concepts of each case, clinical oriented sessions (Pakistan).
- A way better and systemic approach to topics (Pakistan).
- This has been the most fantastic learning resource in my preparation for 2b. I had not missed a session since learning about this from a colleague. The quality of the teaching is consistently at such a high standard. I have recommended this learning resource to the rest of the trainees in my deanery. It's useful for all stages of training. The teaching on these sessions is truly exceptional. I can't thank you enough (UK).
- The fact that it is free, the case based model of teaching and demonstration of key signs by consultant radiologists (UK).
- Very comprehensive covering different aspects of radiology with focus on how to answer exam questions (Kenya).
- Useful exam tips-important cases-How UK trainees tackle cases (Egypt).
- All aspects were valuable and useful (Pakistan).
- The format of teaching (Egypt).
- Teaching as rapids and viva for each section (Pakistan).
- The real viva sessions (China).
- Covering almost all aspects of radiology with excellent tips for exam (Egypt).
- Wonderful teaching style like spoon feeding as well as simple to complex cases (Pakistan).
- Every aspects especially MSK and CNS (Pakistan).
- Teaching and case discussions (UK).
- Excellently structured, thoroughly comprehensive , a great variety of cases and exam minded discussions (Egypt)
- Dr Khan specifically teaching- very logical and relevant for the exam (UK).
- Opportunity to present. Exam tips. Exam cases (UK).
- All aspects especially gynaecology, urology and brain (Egypt).
- The concentrated information in short available time which make it an excellent chance for rapid review for the exam (Egypt).
- viva practice and case based teaching (UK).
- Almost everything was great about this course, amazing sessions with good cases, a lot of learning points regarding both exams and clinical practice (Pakistan).
- ST1 to ST4, ST4 Vivas, Mini Basildon A to Zee (Malaysia).
- Amazing collection of cases, great teaching with exam tips, very relevant to FRCR 2b exam prep (Pakistan).
- A lot of cases , different teachers with different experience (Saudi Arabia).
- It's teaching and encouraging style (Pakistan).
- The interactive sessions between candidates and consultants (Pakistan).
- Systematic comprehensive overview of topics. High lighting the clinical relevance of certain bits of complex anatomy. Highlighting key differentiators between certain conditions that can appear similar (UK).
- The detailed teaching by the lecturers (Nigeria).

## Full Course Feedback - FRCR 2B Autumn 2021 Exam Teaching

- Clear basic concepts, We also got an idea of what are the type of cases that might appear in exam, as we are not aware of these in overseas countries (India).
- The mini A to Z sessions and the viva sessions. All very high equality and EXCELLENT (UK).
- Each n every aspect (Pakistan).
- Exam cases , viva tips , radiological normal as well as pathology appearance and what not (Pakistan).
- OBS/GYN (Nigeria).
- Exam relevant cases with easy to assimilate teaching focussing on basics (UK).
- Viva type session are best (Pakistan).
- Very valuable (Pakistan).
- All important aspects of FRCR 2B exam were covered (Pakistan).
- Exam tips and case discussion (Pakistan).
- Great sessions with practical exam points (India).
- Everything. The challenging cases, the teaching is also to the point (Egypt).
- The lecturers level of knowledge and presentation (South Africa).
- Online, case based discussion (India).
- Teaching very basic and also stuff related to the exam (India).
- Covers most of the curriculum in an engaging way with combination of lecture and case based/viva teaching (UK).
- Excellent teachers (India).
- Very focused and exam oriented. Good pace and valuable resource (UK).
- A-Z (UK).
- Excellent viva style cases. System based sessions are useful and easy to follow (UK).
- All teachers, cases, concepts. All in all. Awesome (UK).
- All are excellent (Egypt).
- All aspects very effective (Egypt).
- Cases, teaching, approach and everything (India).
- Dr. Sami. He is the best (Pakistan).
- Variety of cases and their explanations (India).
- Quality of speakers and cases (UK).
- Good and clear explanations (UK)
- Everything (Pakistan).
- Most useful (Saudi Arabia).

#### **4. Please describe how this course has impacted your preparation for the FRCR 2B exam.**

- The timing of the sessions was great - evenings - allowing me to revise during the day and attend these sessions in the evenings. The length - 3 hours - was also great allowing us to cover a lot of the syllabus. High quality teaching, highly relevant to the exam, vast number of cases, great tips, viva simulations in the exact same format of the exam so we know what to expect. All free of charge (UK).
- It has been invaluable, Dr Khan (and colleagues) has demystified so many difficult concepts which I have struggled with for many years. I feel more confident about how to present, and how to tackle the rarer/syndromic cases which we don't get shown in our Trust viva practices (UK).
- Improved my understanding of the pathologies faces in the FRCR 2b exam and allowed me to develop my viva skills (UK).
- A huge difference in my reporting and the way I am searching for the pathology (Egypt).
- Boosts confidence (Pakistan).
- Great orientation to be safe radiologist and which important resource to read from (Algeria).

## Full Course Feedback - FRCR 2B Autumn 2021 Exam Teaching

- Actually, I have not appeared any FRCR exams. Doing local postgraduate. Even though, these teachings are a worthy gift for me by giving basic concept, improving it and added much more beyond my training (Pakistan).
- This is helpful in preparation, more systematic learning and also in daily reporting as well (Pakistan).
- For an overseas candidate this course brings me closer to the radiology practice in UK, Its without charges. Easily accessible. Timing is good (Sudan).
- Really helpful. Thanks a lot for your guidance (India).
- Highlighted gaps of knowledge and was taught extensively (UK).
- I will be more confident when handling cases (Kenya).
- Put me on the right track (Egypt).
- It gave me an understanding of FRCR exam and improved my knowledge (UK).
- It has make me more focussed (Pakistan).
- Learning from the cases and how to think and describe to reach the most useful differential diagnosis.
- Make me pass the FRCR (Iraq).
- Confident just ahead of exam (Pakistan).
- It has revised important concepts (Pakistan).
- I developed confidence for case presentation after attending the course (India).
- For foreign candidates excellent exercise to polish their knowledge and skills (Pakistan).
- Very good impaction on our preparation. This course gave us a systematic way to prepare for the exam (Pakistan).
- It exposed me to lots of cases, including cases I do not get to see much of in my usual practice. The explanation of the findings were thorough and has helped me prepare adequately for the exam (Nigeria).
- Very helpful...Boosts up confidence and gives a gist of UK training esp for non UK candidates (India).
- It has taught me how to present a case during the viva, It has taught me to follow a systematic approach while tackling a case. To have differential diagnosis relevant to the particular case. To speak on any pertinent negatives. All in all an exam tailored course which has been invaluable to tackle FRCR 2b (Kenya).
- This course has hugely impacted my preparation and allowed me to understand many concepts and more importantly see loads of cases. It was not only useful for exam but also for my day to day practice. I am grateful for your efforts, thank you very much (UK).
- Helped me immensely and instill confidence in me to face FRCR 2B exam (India).
- Getting regular teaching has been invaluable to the point where I do not even mind having the sessions in the evenings or if they go past the allotted time (UK).
- Tremendously helpful, gave orientation (UK).
- It was a focused course with dedicated exam based knowledge and near real viva sessions (Pakistan).
- I have learned a phenomenal amount. Too much to even begin explaining. Every session has been such a great learning experience (UK).
- It has immensely helped in preparation, however an earlier start and an earlier end prior to the exam, in line with UK exam dates would be great, i.e. start mid/end July and end in mid/end September (UK).
- Though we see cases ourselves we do not know what examiner may ask and in simple cases how anatomy may be important for a simple finding .
- More motivated to fill any gaps in knowledge, different approach to certain topics.

## Full Course Feedback - FRCR 2B Autumn 2021 Exam Teaching

- Thank you so much Dr Khan and his team for being with me in hard time. SAVIOURS, Allah bless you all (Pakistan).
- Help me to know what types of cases can come in exam and what questions are asked what we are expected to answer (Pakistan).
- To much more than I expected (Egypt).
- I am still not pass FRCR2A, but I learned many things not knows before (Oman).
- It's give us insight that how and what to prepare . Type of cases. Details of each section etc (Pakistan).
- It gave me a great idea about how viva is managed (Oman).
- It has cleared some misunderstandings of basics and rapid revision (Pakistan).
- As my training is from Pakistan so this course is helping how to take case in FRCR (Pakistan).
- Provide additional learning resource. Easier to revise chapman after watching the teaching, provided context (UK).
- This course has helped me a lot in learning Radiology though I have not given any FRCR and I am planning to give RANZCR. I am hoping the teaching by Dr khan will definitely help me at some point of time during my RANZCR exam (India)
- It had made me very interested in giving FRCR exam as I'm planning now to go for it whenever given the chance (covid problems delaying it) (Pakistan).
- Feel more confident having seen so many more cases alongside consultants explaining the key findings, and their significance (UK).
- I realized there is much I need to prepare for. With this course, I also felt it was much easier to understand as a lot of things were explained thoroughly. I really enjoyed this course (Malaysia).
- I am more familiar with description and approach of exam cases by trainees from different countries and what is expected from a 2b candidate (Pakistan).
- Improved my confidence (Kenya).
- Yes , I'm now planning to appear in FRCR 2b (Pakistan).
- It has given me insight into Radiology learning (Pakistan).
- It has helped me build a better approach towards different cases (Pakistan).
- It made me more familiar with exam environment and how to approach the cases and present my answers. Also what cases to expect (Egypt).
- It has helped me to become confident and become a good and safe radiologist (UAE).
- It's just extremely helping for my preparation for exams as well as training (Nigeria).
- It help me a lot with preparation and over all understanding of radiology. Sir u made radiology palatable (Pakistan).
- Seeing the candidates approaching the cases and descriptions from both candidates and the speakers make me familiar with the exam (Myanmar).
- It covered all the exam topics (Pakistan).
- It means a lot , excellent very outstanding course by best teachers in the world especially Dr Khan (Pakistan).
- It has done a good revision for the whole course (Sri Lanka).
- Given me true understanding of how exam operates and what the RCR is looking for in candidates (UK).
- More organised and also discipline to follow schedule (Malaysia).
- It has improved my approach to various imaging modalities (Pakistan).
- Helped in learning Radiology (Malaysia).
- Making a good foundation (India).
- Passive learning with listening the course (Pakistan).
- I'm a radiology resident, it has been useful for my residency. I hope to apply for FRCR exam soon (India).

## Full Course Feedback - FRCR 2B Autumn 2021 Exam Teaching

- Increased knowledge and improved confidence for the exam (India).
- Given me confidence / tips and tricks (South Africa).
- Giving overall idea of an exam (Canada).
- It greatly helped me to know how to approach the viva, how to think and increased my self-confidence (Egypt).
- Got me into the mind-set and groove (India).
- Significantly improved my presentation skills (India).
- More focussed and targeted approach to my preparation (India).
- It has given good insight about how exam will be (India).
- It has been extremely useful in consolidating my knowledge (UK).
- Helped to approach cases (India).
- Increased basic understanding (Pakistan).
- This is my basic preparation that gives me the confidence for the exam (Egypt).
- Added value to my preparation (UK).
- It gave the idea what examiners expect from the candidates in the examination (India).
- Very helpful for exam as well as my day today practice (India).
- Very good useful quick revision (UK).
- Enriched refreshed my knowledge (UK).
- Faced by exam similar cases and for daily practice (Egypt).
- Enhance my information about cases very much (Egypt).
- In depth knowledge of the subject improved (India).
- Definitely useful (India).
- Booster the confidence (India).
- Help me a lot (Saudi Arabia).
- Helps consolidate learning (UK).

### **5. Please provide a comment on the structure and organisation of this Mini Basildon A to Zee course series.**

- "Great topics, teachers, quality, organisation, feedback. Perhaps if it was spaced out over a few more weeks, it would mean more people would attend- it has been every weekday evening so it is difficult to attend all sessions due to on call commitments even though I wanted to. Also, being so close to the exam, many people have arranged to do practice with colleagues/local consultants so personal study conflicts with attending the A to Zee course" (UK).
- It is a very great initiative, as a student I feel this approach of A to Zee series is very great way of covering the most important topics (UAE).
- Excellent course organisation and structure. The viva sessions were really well coordinated. Great communication with the candidate pool through the use of WhatsApp. Excellent structure in creating candidate lists and giving everyone a chance to participate (UK).
- Loved every aspect of the course. Was lucky enough to attend most of the sessions. Very helpful indeed (UK).
- Thank you very much Dr Khan and your excellent colleagues for your help and teaching (Egypt).
- Very much organized and useful (India).
- Wonderful, covering all major exam modules system wise and in viva cases (India).
- It's flawless (Pakistan).
- Organization was wonderful and the Faculty was excellent (UK).
- Excellent organisation. Registration, Feedback and CME certificate link seamless. Prompt communication about cancellation of sessions (UK).

## Full Course Feedback - FRCR 2B Autumn 2021 Exam Teaching

- It is the best course, I would recommend to everyone (Pakistan).
- Loved it! (Myanmar).
- Excellent (UK).
- Well organised (UK).
- I think the format was very good (Pakistan).
- Well organised and crisp FRCR course to the point (India).
- Continue the same and do more short session which cover all the systems (India).
- Great idea (UK).
- Repeat it again and Gain (Egypt).
- Excellent structure to be split into systems (UK).
- Phenomenal (UK).
- Would be nice to have it repeated and includes GI/Liver , breast and IR (UK).
- Course is very good (India).
- Excellent. Technical issues will be inevitable and that is very much understandable from my side (UK).
- More than excellent (Egypt).
- Excellent organization (Egypt).
- Well-structured and covers a good range of topics (UK).
- Professional (South Africa).
- Well organised and prepared, considering dates and timing. Also, the doctors are very dedicated and committed (Egypt).
- This very interesting to cover basics rapidly and for revision (India).
- I think it was very well designed. Everything cannot be taught or covered at the last minute (Pakistan).
- Well organised, would suggest smaller sessions over a longer period (UK).
- Perfectly organised. A dream came true (Pakistan).
- Well organised (Pakistan).
- This is very inspiring and helpful especially in COVID times (Pakistan).
- I like the current structure with 3 hour viva sessions periodically and also the 3 hour mini A to Z sessions (UK).
- It's the best I have ever seen in radiology teaching. It should be encouraged (Nigeria).
- Good with reference to Chapman DDX and clear diagrams and images (Egypt).
- It's just perfect (Pakistan).
- It has been an outstanding course. Amazing effort by whole team (Pakistan).
- It's very well organised going topic wise hitting exam scenario (Pakistan).
- Excellent structure. Not always able to attend sessions due to short notice but have been invaluable when I have attended (UK).
- Well organized course , highlight important stuff, good exam viva practice , candidates can assess themselves. overall good practice (Pakistan).
- We can't ask for more. Just amazing everyone and everything (Oman).
- More than enough for those who attend main course before (Egypt).
- The best-ever quick course before exam (India).
- Very well structured with set breaks. Good length of session. Not too long or too short (UK).
- No words for this! It's excellent (Pakistan).
- Well organised with targeted topics announced in advance to try to cover all 6 modules (UK).

## Full Course Feedback - FRCR 2B Autumn 2021 Exam Teaching

- Thank you for this course and all organizers (Egypt).
- These are great sessions with appreciated effort (Oman).
- "Very good initiative, Sometimes it's difficult to complete whole session due to duties (Pakistan).
- Very structured and organized study material and equally good teachers (India).
- it was superb well organised course (Pakistan).
- Fantastic. The structure is great. At times it can be difficult to get home for the 6pm start in the UK but this is not a problem and I have arranged my days to attend the teaching. I have unfortunately missed a few sessions due to evening on-calls and only wish there was an option to watch each session on catch up (UK).
- Simply brilliant. The examiners are taking their own time in doing this and providing this teaching for free. Such benevolence in the UK is non-existent! Teaching in training schemes are variable, some with excellent teaching, some patchy. DKT will benefit everyone particularly those with less support from the training scheme (UK).
- This was the best which helped quick revision of each system (Pakistan).
- "Thank you so much for this great opportunity to learn from the experts. Please consider doing more sessions, for example since CNS is long and the usual 12 hour sessions are no longer possible, the CNS can then be split into parts to enable a more detailed covering of all the topics Also please consider inviting a consultant to cover cardiovascular and interventional radiology as this is a grey area for many international candidates" (Nigeria).
- It was great. Touched on salient areas (UK).
- Really good idea to offer a summarized version of the original content and serves as an excellent refresher (UK).
- The structure of the course with different systems on different days is quite useful in maximising understanding of concepts (Nigeria).
- Very good content...Giving explanation of typical exam case after each candidate tells about areas we need to work on (India).
- It was well structured and organized into the various organ systems given the time constraints (Kenya).
- Very useful and invaluable material was provided in this series (India).
- Man doesn't but Allah rewards to people who are exercising to polish 3rd world medical professional's knowledge and skills to serve their community better (Pakistan).
- One of the best course I ever attended (Pakistan).
- Structure is well managed and best suited for the real life exam scenario (South Africa).
- I like the mini teaching sessions combined with viva sessions (UK).
- It was wonderful (Pakistan).
- The course is really well organized (Kenya).
- Very excellent, elaborate and nice sessions by all faculty (Pakistan).
- These were excellent lectures. Lectures have definitely boost up our radiological skills (Pakistan).
- Well-structured and organised with the best sub specialist radiologist. We learned something with each of them in their domain (Algeria).

### **6. Please outline any suggestions to make these courses better.**

## Full Course Feedback - FRCR 2B Autumn 2021 Exam Teaching

- It's one of the best course I am attending, that too without a charge. Just a request if the recordings can be available it will benefit students most as if they miss any topic can have still a chance of listening to them, also for the once already listen can revise it again and again (UAE).
- Course is already covering everything, perfect in all aspects (UK).
- Excellent going (India).
- Please continue to provide support (UK).
- No specific suggestions (UK).
- Keep up and take more candidates (Egypt).
- It is great going (Pakistan).
- Kindly give assignments for active learning in previous class and discuss those questions and cases (India).
- To hasten the process and take over to discuss the answer when the candidate takes too long to answer (not to the point) (Malaysia).
- They are up to mark (Pakistan).
- A bit more emphasis is placed on MSK at the detriment of other radiology sub specialties (UK).
- Please let the people from Indian subcontinent to have recordings of this teaching, because of the time zone difficulties (Sri-Lanka).
- Just if rapid revision done at end to consolidate everything taught (Pakistan).
- You should continue these viva courses system wise after exam as well (Pakistan).
- It's too late for Pakistan regarding timings please as we have to go to on duty tomorrow in winters it ends at 2:00 am, please do it on Saturday if possible (Pakistan).
- Poll to interact with audience can be added, or open questions to audience (India).
- Further 3 hour A to Z sessions covering the whole syllabus (UK).
- Make it available offline as videos (Egypt).
- Sessions for more topics! (UK).
- Wish it was started bit early as my exam in a day (Pakistan).
- The candidates should be changed every time the choice should be by time of applying for the viva and no repeating (Saudi Arabia).
- The timing is very late for Indians to attend, a slightly earlier timing by about an hour, would be more helpful. Also sharing of a recording of the sessions would be helpful if missed or for revision (India).
- Only the problem for Asians is the quite late hours which make you sleepy when you attend the whole 3 hour session and it's gets difficult to concentrate. It would be good if recordings are available on request (Pakistan).
- Do repeat these courses before the exam extremely useful for exam students (Pakistan).
- I am strongly suggest to put video recording of this mini course on the website (only the mini course) (Egypt).
- For future if we can do it early say 3 months before exam-sitting (India).
- It's best not any suggestion (Pakistan).
- There are times where I am unable to attend such as on call. A recap or video on demand may help here, but due to the 3h length of these sessions I am not sure if I would be able to find time would to re-watch them. A super summary of key cases may be useful (UK).
- Already best (Saudi Arabia).
- May you kindly make the course available on demand. Due to other commitments it's not always possible to attend all courses (South Africa).

## Full Course Feedback - FRCR 2B Autumn 2021 Exam Teaching

- The course is already well structured. However, aspects of the course that involves long teaching can be made shorter to help keep attention for longer (Nigeria).
- Would seem a bit greedy but would have been amazing if there were few more sessions covering some peripheral exam topics and exam systems as well.. GIT especially.. But overall.. hats off to Dr Khan and team for such humongous selfless effort and also Dr. Azhar for kind co-ordination.. Only The Almighty can reward for these tremendous task.. Ever indebted..! (India).
- Hopefully in the future you can start earlier with A to Z sessions, one for each module and then later progress to viva only sessions closer to the exam (UK).
- It was a pleasure listening to Dr Khan each day. I am sure this course had benefited every one of us (India).
- Keep it up (Pakistan).
- It's already best (India).
- No suggestions (UK).
- Run full course (UK).
- Such sessions should be arranged more frequently (Pakistan).
- Should b allow to record these lectures or it should be like this than we could purchase these video lectures, that at any time we freely revise these valuable conceptual things (Pakistan).
- Make it more frequent (Iraq).
- Already well organized (UAE).
- Some are very fast if they give more time or limit content for important to know (Algeria).
- Hopefully more topics can be included in this course (Malaysia).
- I think if the whole thing was delivered online every year it would be beneficial, as it means more people can participate and benefit. Attending the A to Zee course in person was limited by numbers, and it was difficult to get a place due to incredible demand. 2) Please either show still images or get examiner to scroll dicom cases, as scrolling issues for candidates can cause some time delay (UK).

### 7. Do you have any additional comments?

- Nobody else is doing what Dr Khan and his team are doing. Don't have words to explain our immense gratitude for all your kind efforts and encyclopaedic wisdom (UK).
- Thank you very much for this teaching. It has really helped us prepare for the exam. If we pass it will be down to you (UK).
- I love Dr Khan and his teaching. Anjali is just exceptional same goes for Bhavin and Sayed. These are great teachers. The others are equally excellent. I wish we can have more of these teachings (Nigeria).
- Keep it up Dr Khan and his marvellous team. If I pass IA I owe a lot to you and your team (Pakistan).
- Thank you! it's a great help for radiologists who trained in resource limited countries (Kenya).
- Thank you so much to Dr. Khan and your team for everything. Thank you so much (Malaysia).
- Please keep this running for free for as long as you possibly can! My colleagues and I will definitely contribute to your program when we become consultants and have some expertise. I am sure everybody who benefits from your teaching feels the same way (UK).
- Hats off to the DKT team for doing such amazing sessions. They have made me a better radiologist (Pakistan).
- A massive thank you to Dr Khan and his dedicated faculty of teachers! (UK).

## Full Course Feedback - FRCR 2B Autumn 2021 Exam Teaching

- Great work (Pakistan).
- Thank you all for taking your valuable time in teaching us (India).
- Only thanks and prayers (India).
- Appreciative of this magnanimous gesture to teach us without charging a dime. Thank you (South Africa).
- Thanks for all teaching doctors (Oman).
- Great Teaching (Pakistan).
- Great work so far by Dr Khan & team (Malaysia).
- Excellent course and Brilliant effort (UK).
- Would like to access all recorded sessions. Chances are for candidates from different time-zones and work-shift (on-call) (Malaysia).
- Excellent series. Can't thank faculty enough (UK).
- It is the best teaching program so far. Thank you Dr Khan and his team (Pakistan).
- Marvellous (Pakistan).
- Focus on RR, overcoming false Findings in exam (India).
- Thank you Sir Sami khan and all faculty members for providing such an amazing opportunity for us. God bless you all (Pakistan).
- Thank you all, especially Dr Khan, for your time, dedication and wisdom (UK).
- Thank you so much. May God bless u with health and happiness (Oman).
- Great work and thank you (Pakistan).
- Great course, thank you so much for providing it free of charge! (UK).
- The effort and time provided by the consultants who taught on the course are much appreciated (UK).
- Thank you so much, all DKT team. excellent sessions (Pakistan).
- This efforts and dedication is greatly appreciated (UK).
- Thank you for great effort and contentious teaching. Thank you Dr Khan and your team for your time and effort (Egypt).
- Would like to thank Dr Khan and all teachers for generously putting their valuable time and efforts on this course (China).
- "Thank you very much sir. It's a Sadqa-e-Jaria. May Allah give you and your team health and all of his blessings" (Pakistan).
- Very grateful to all DKT teachers. Thanks a million for your time and effort (Egypt).
- Yes, I'm so glad for this great opportunity, I've learnt so much from you (Nigeria).
- I hope you will offer the full Basildon A to Zee Course next year (South Africa).
- I would like to say a big thank you for the teaching and feel very privileged to learn from you all amazing teachers (UK).
- Excellent, superb and outstanding way of teaching (Pakistan).
- Thanks to Dr Khan and his team and thanks to covid-19 (Pakistan).
- Always keep it up (India).
- Very fruitful (Pakistan).
- Thanks to all the teachers for your dedication. All the sessions were so good (UK).
- Thanks for the great effort, Legendary team of teachers! (UK).
- Appreciated (Malaysia).
- Excellent sessions. A big thank you to DKT faculty for making this happen. God bless you (Kenya).

## Full Course Feedback - FRCR 2B Autumn 2021 Exam Teaching

- Extremely grateful that Dr Khan and team has spent so much time and effort to provide such high quality teaching (UK).
- Super-duper course (India).
- Great thank for all our boss thought us (Sudan).
- More learning classes like this will be helpful. If FCPS radiologist are allowed to do fellowship will be more beneficial for us. Or mini fellowship online should be considered (Pakistan).
- Liked the structure of this session, a lot of effort went into preparing the slides and discussing anatomy. Thanks (Singapore).
- Great job, we are very obliged (Pakistan).
- Thank you for all your effort that too free of cost for students like us it is a boon. Thanks (UAE).
- Thank you so much to Dr Khan and the DKT Faculty (UK).
