## Testimonials

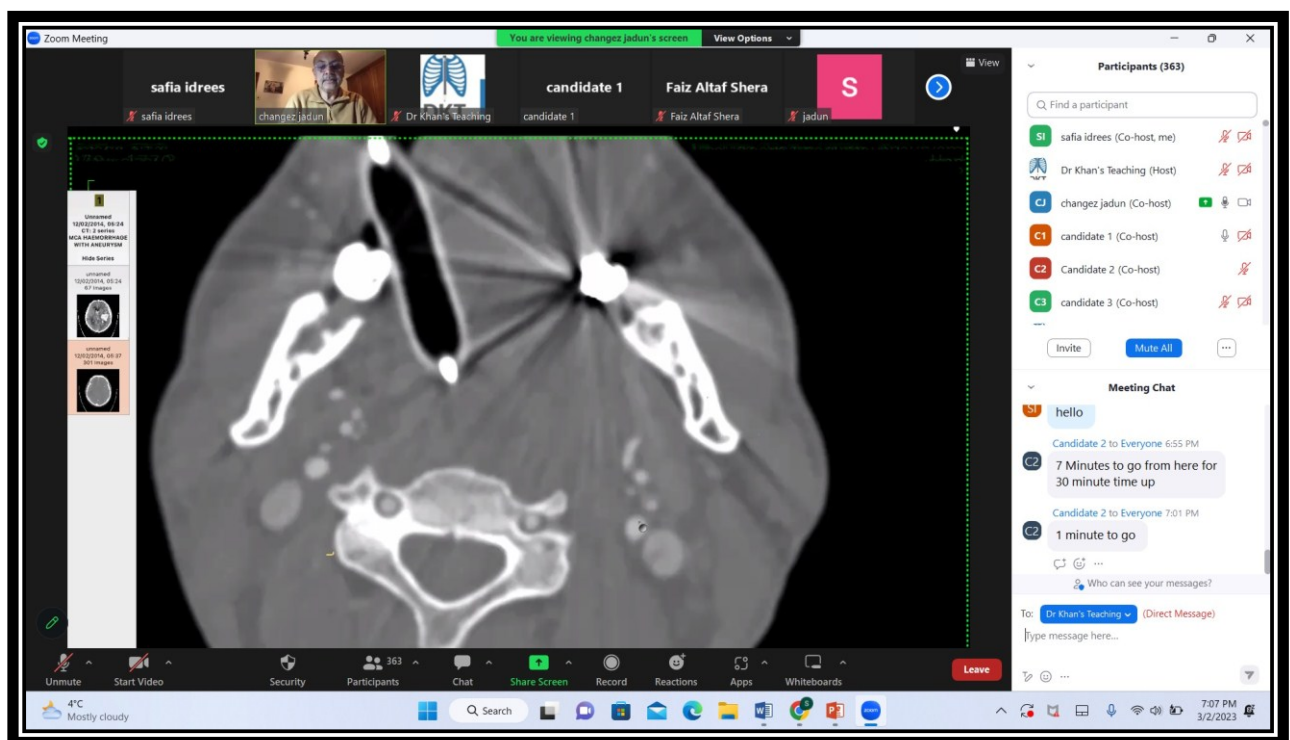

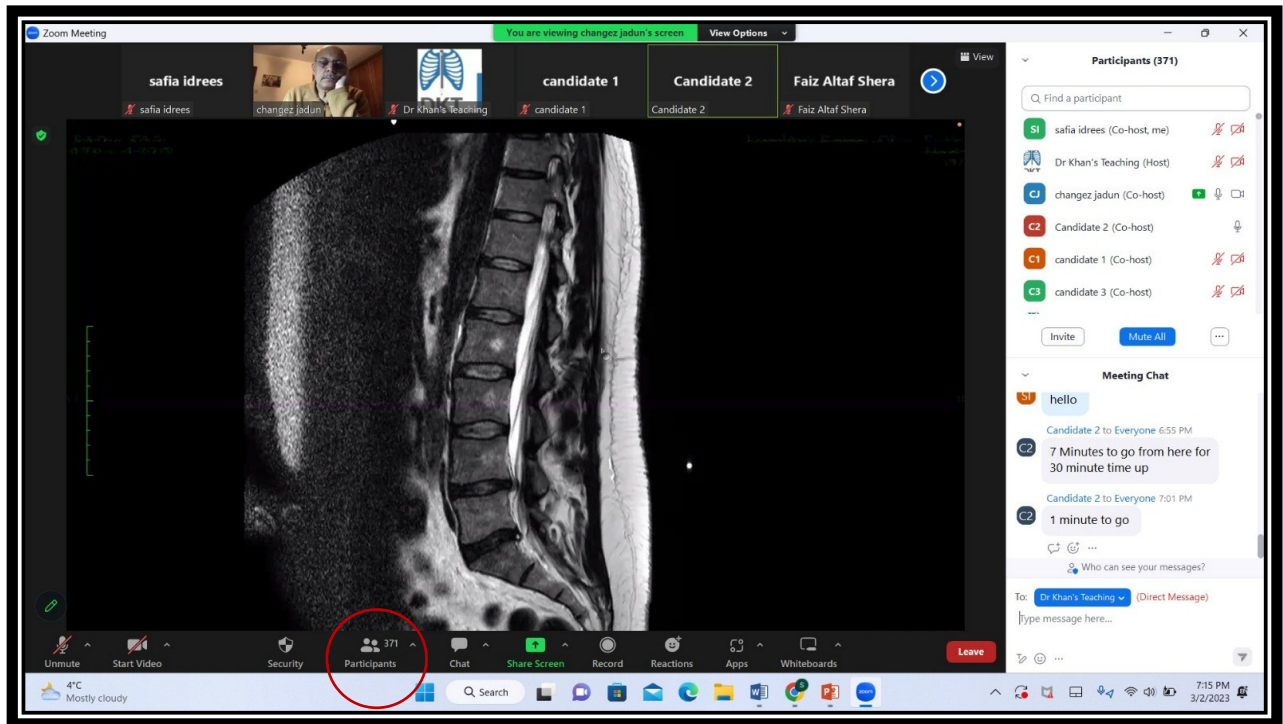

- Superb cases, really nice mixture of CT and MRI of neuro, good level of difficulty - realistic to real exam- I wish I can watch his whole session again and see the cases again. I especially liked Dr Jadun's teaching after each case where he explained how he would present the case, this was very helpful to fine-tune my own presentation skills. I also loved his exam top tips about age/history/and contrast/non contrast. It can be so overwhelming trying to remember all your knowledge in the exam under pressure, so just these three top tips will help keep us on a structure and reduce our stress levels! (UK).
