Testimonials

- Simply brilliant session, can't thank enough! So useful to have a blended mock rapids and mock viva session. All for free and delivered online so we can attend from comfort of our homes around the globe. So many people would be charging hundreds of pounds for courses like these. The calibre and quality of DKT teaching is unmatched and it's all for free, we are very lucky indeed (UK).
- Really high quality and excellently delivered teaching session by DKT once again. Dr Nadir has compiled a fantastic set of paediatric practice rapids packets. The timing and organisation was good. The pace was perfect. The mock exam setup reflected the real exam well. The cases were a mix of normal and abnormal. The explanations after each case were brilliant. Dr Nadir answered all pertinent questions from attendees throughout. He cleared up many of my misconceptions. He was very humble and even corrected himself about one case. Simply marvellous teacher with a clear passion for paediatrics, please show us the rest of your rapids compilation in future sessions before the next exam sitting. Dr Eiman had prepared wonderful practice viva cases. They encompassed a whole range of body systems, pathologies, and modalities, which was very reflective of the real 2B viva. She is so patient and kind as an examiner, very encouraging. Her feedback was superb, she pointed out all the main findings in each case and explained what needs to be included in a model answer. The diagnosis of each case was clear and she left no ambiguity. A brilliant teacher as always and an asset to DKT. Nice to see her present a session again and please return for many more, respected Dr Eiman (UK).
- Please can we have another session dedicated to paediatrics. I want to see all of Dr Nadir's very useful practice rapids packets. No online resource is doing paediatrics only packets, so it was so useful

FRCR 2B Practice Viva (Session 33) – (1) Special Mock Exam Rapid Reporting: Paediatric Cases Only (3 Packets) (2) Mock Exam Viva: 2 Candidates

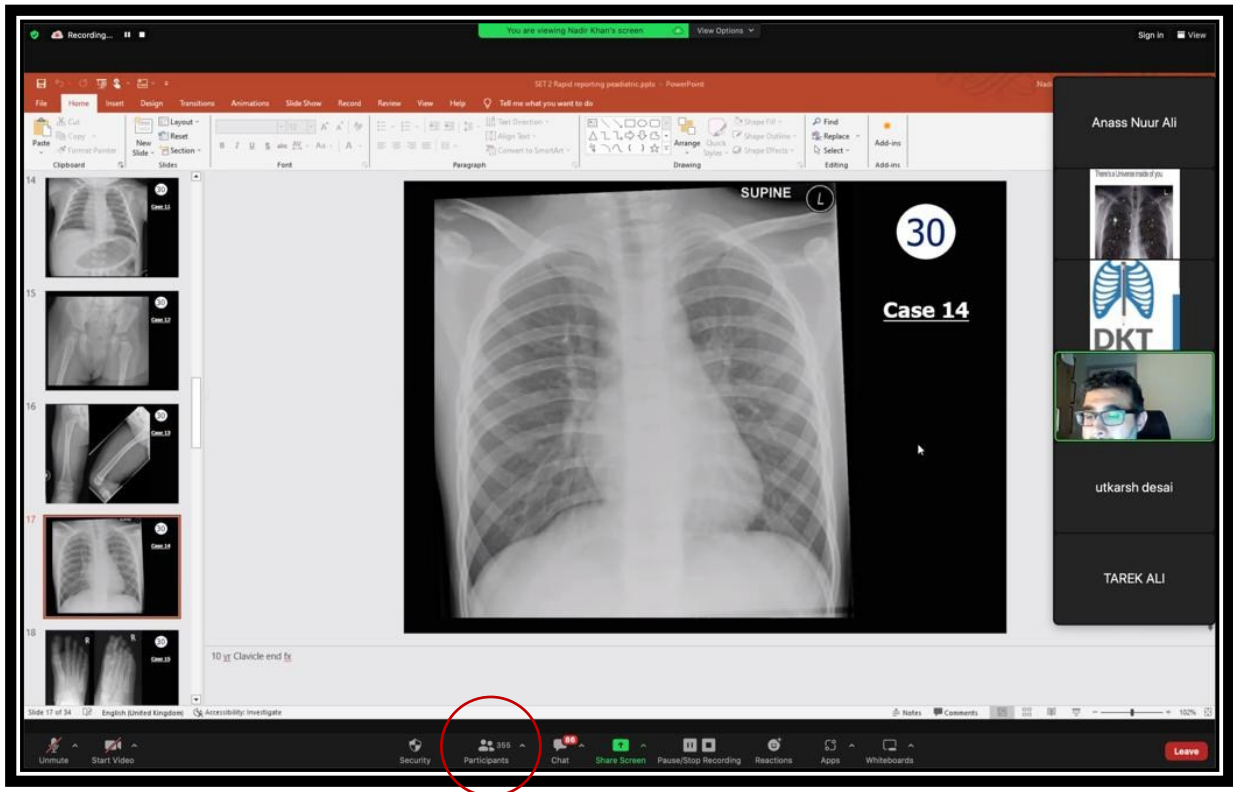

and high yield to see mix of all paediatric cases. Please arrange more paediatric sessions as it's a tricky topic and traditionally not well taught/very variable in UK training programme (UK).

- Paediatric is real tough and it was an extremely good exercise to go through the paediatric RR films many of my concepts were cleared tonight (Pakistan).
- Great cases and explanation from Dr Khan (UK).
