Testimonials

- Every aspect of this session was awesome. The theme is great. We keep seeing cases, we keep learning but what to say and how to say in exam setting is crucial for passing this high pressure exam. Selection of cases, then the teaching, important exam points and the way Dr. Mehta summed up the teaching towards the end, was what was really need (Pakistan).
- Excellent viva session. The doctor explained everything clearly and structured the discussion well. He placed strong emphasis on the essential steps to becoming a safe and effective radiologist. The session was full of valuable take-home messages and practical tips, including guidance on clinical reasoning, appropriate next steps, and which imaging modalities to request. Very insightful and informative (Algeria).
- Excellent session. Thank you so much for guiding us regarding the management & referral of particular cases, especially where to stop & not to overdo (India).
- Amazing preparation for exam candidates even for non FRCR candidates. Thanks a lot! (Zimbabwe).
- Each word of Dr. Aditya Mehta is worth remembering. Excellent way of teaching! (Pakistan).
- Overall, the lecture struck an effective balance between theoretical knowledge and practical imaging interpretation, making it highly informative and exam-relevant (India).
- One of THE BEST learning sessions ever. Unfortunately I missed the starting part. Its my humble request to please please rebroadcast this session in the coming week because it was too valuable to miss even for a second. And please continue this line of learning alongwith already going on themes. Thank you so much Dr. Khan and Dr. Mehta for this best of the best session. we need more of this (Pakistan).

FRCR 2B Practice Viva (Session 107) - DKT Masterclass - Ace the Viva: What The Examiners Really Want to Hear?

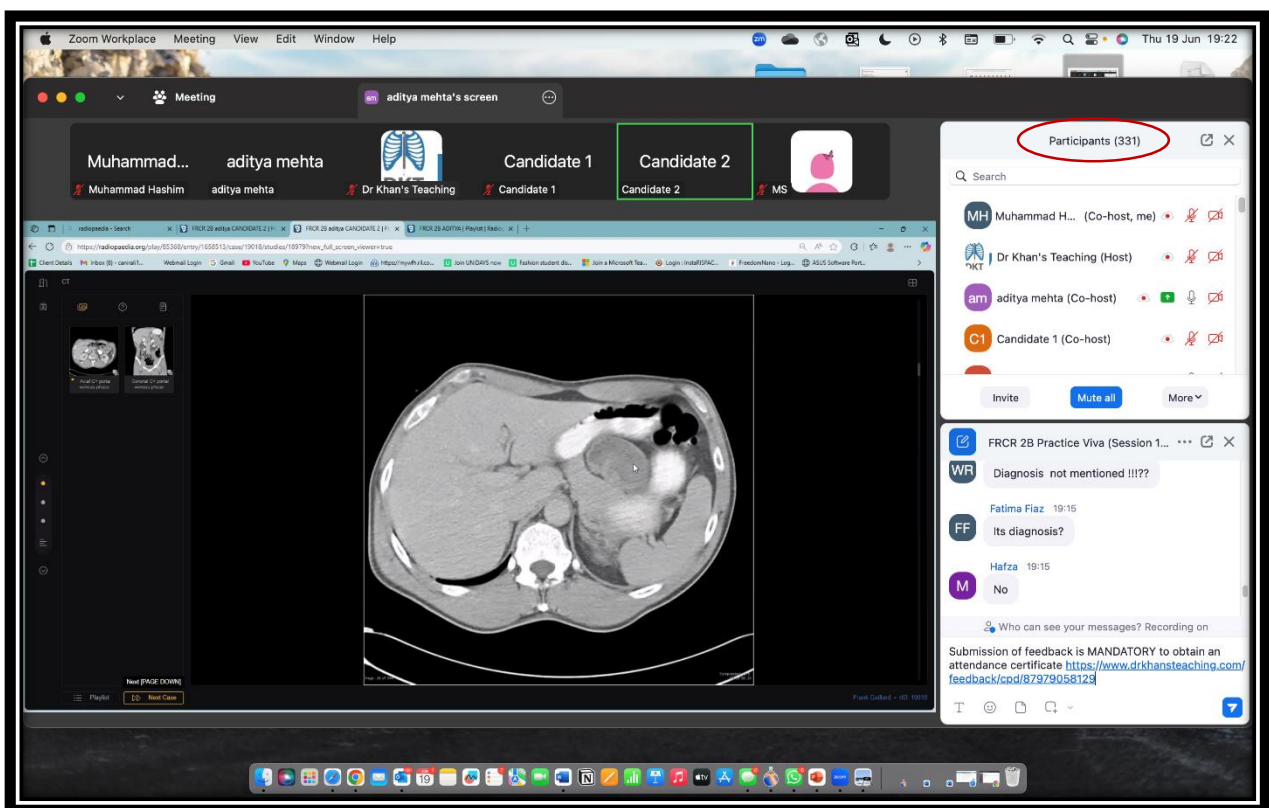

- Case selection and discussion was useful (UAE).
