Testimonials

- Excellent as always, learnt a lot more via DKT than I did ever during my MMED (Kenya).
- Great style of teaching. Loved the case based approach and Dr. Khan being a patient, non-judgemental teacher. Always focuses on constructive feedback. Loved it! (Norway).
- The best ever lecture I had by the master king of radiology, Dr. Khan! Nice case sharing! (Malaysia).
- The new format of teaching on the CT and MR cases really works. Exceptional range of cases with great teaching points as always from the master! (India).
- Cases are super selected with brilliant Dr Khan's way of teaching, words can't express how this effort is appreciated, Many Thanks Sir (Egypt).
- Really enjoyed the range of cases with no specific themes, it mimics exam and helps see multiple cases (UK).
- Very informative discussion, thanks a lot. You are the best radiologist ever (Palestine).
- Very much important teaching points were discussed for each of the cases. It is completely fine if you keep on teaching us on the displayed cases, as we could also take our own notes. The lessons you give us are truly invaluable!! (Ethiopia).
- Very nice format and lecture, learned a lot. May Allah bless for sparing your time for such quality teaching which we missed during our training in Pakistan (Pakistan).
- A lifesaving session for us in the LMIC (Chat log).
- The lecture was very extremely useful for us as the presentation was very useful as many of interesting subjects were covered with easy presentation and useful theory (Jordan).
- I like this teaching format very much and what I most like is that Dr. Khan shows us the pathology with the cursor, which is very informative to hear and see the pathology (Sudan).
- This multisystem approach is very good as it catches you by surprise and teaching points related to exam were great (Saudi Arabia).

- The newer strategy is even better. All cases were too good from exam point of view (Pakistan).
- Very helpful excellent exercise for both viva practice and day to day reporting (Pakistan).
- Excellent teaching method on the cases. This is great. We should continue with this format. Good case selections too (UK).
- Excellent cases and explanations by Dr. Sami Khan. It was very helpful. I preferred the way the cases and explanations were done today, rather than using PowerPoint presentations (UK).
- Excellent cases and teaching. Thank you so much sir. Please include more sessions like these (India).
- I liked the new format, more interactive and similar to the real exam. A lot of tips and tricks were useful (Egypt).
- Excellent. I learnt a lot and I loved it. Thank you so much (UK).
- Very Informative, not only for examination point of view but also useful for day to day practice (UAE).
- Interesting cases addressing the queries which we always had in our minds (Pakistan).
- The case choice and explanation along with anatomy and differentials were useful (Pakistan).
- It's really good and the pace is perfect. Brining cases with similar differential is perfect (UK).
- An excellent new format and insights on how to approach unusual cases were useful! (India).
- Learning what to say during the exam when faced with the case was very helpful (India).
- All aspects were extremely helpful and valuable (Pakistan).
- Very good collection with excellent explanations (UK).
- CT and MRI cases for FRCR 2B were useful (UK).
- Great cases (Libya).
- The whole talk was useful (Pakistan).
- Excellent cases, brilliant grilling and explanation of core concepts (Pakistan).
- Interesting cases, well presented teaching on them (Austria).
- Excellent range of cases (India).
- Excellent viva with very useful discussion (Nigeria).
- Exceptional as always (UK).
- Very helpful session in terms of approaching cases from exam point of view (India).
- Of course, every aspect was useful (UK).
- I loved the content and delivery - this format is good (UK).
- I liked the new teaching way (Qatar).
- Image based discussion was useful, Thank you Dr Khan. Awesome! (UK).
- Excellent case explanations (Nigeria).
- Teaching points were useful (India).
- All aspects were useful (Australia).
- Great cases! Very informative format (UK).
- It's similar to the exam so can you please do it all the time (UK).
- Going through key features of each case was useful (UK).
- All cases and their teaching points were useful (Oman).
- To the point, with theory explanation (Pakistan).
- Appreciate the new format. More in line with current FRCR exam pattern (UK).
- Excellent teaching session (Pakistan).
- Discussion format was useful (UK).
- Nice and great cases (Iraq).
- The direct image-based teaching method was useful (Saudi Arabia).
- The cases based teaching was useful (Saudi Arabia).

- Excellent teaching session and cases (Iraq).
- Very good way of teaching from anatomy to classical cases (Pakistan).
- Teaching method through cases is great (UK).
- Approach to each case was useful (Sudan).
- The teaching and explanations were useful (South Africa).
- Nice teaching style, kindly continue Sir.
- Every single aspect was useful (Nigeria).
- I loved it. Great variety of cases and good mix of CT and MRI - I also loved this new format (UK).
