Testimonials

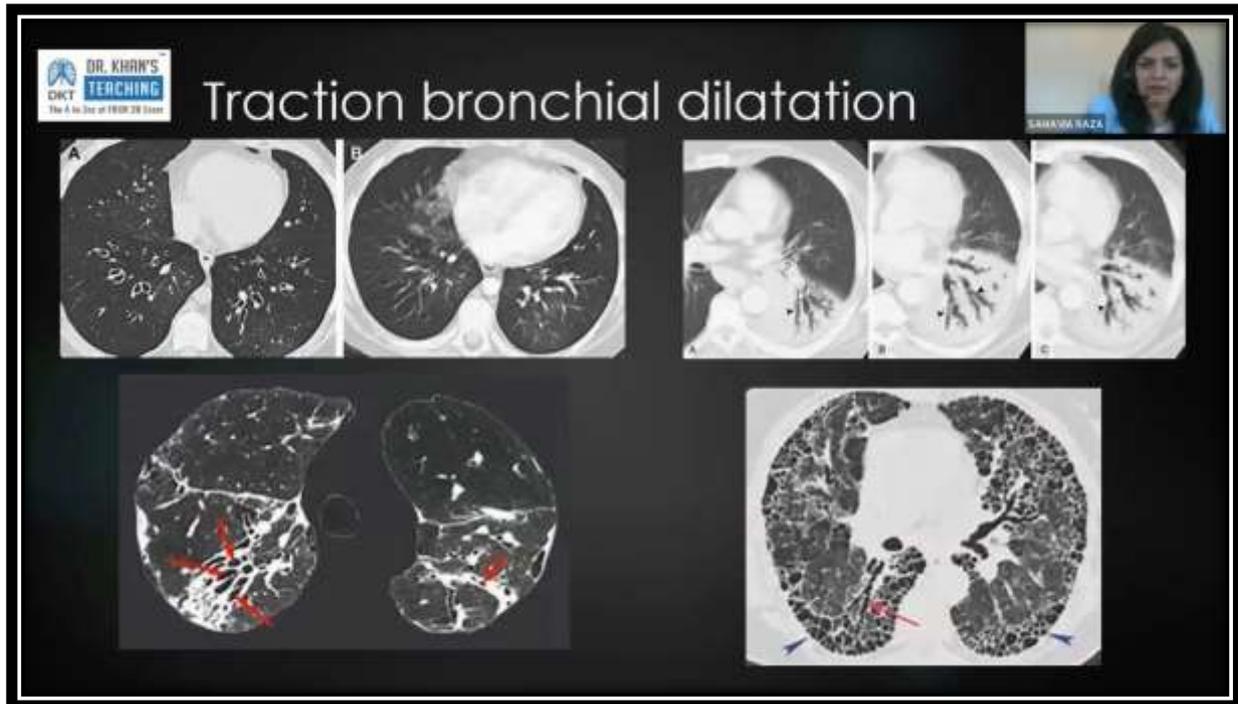

- Clear, concise explanation of different interstitial lung disease patterns, how to approach and report them. Brilliant session and great teacher, many thanks (Egypt).
- Excellent way of teaching by Dr. Raza. We want more teaching from her, if possible, in live sessions (Saudi Arabia).
- I'm very happy that I can now attempt to distinguish between the ILDs (Nigeria).
- The way the ILD was explained and divided into groups was most useful. I was confused before about the classification and subtle change among them. Thanks to Dr. Khan's team. We need more chest vivas in the future (Somalia).
- Dr. Samavia's attention to exam-related details was excellent (Pakistan).
- Useful overview of a complex topic (Norway).
- Well-explained diseases, good cases. Thank you (Austria).
- The differentiating points were very useful, e.g., fibrosis of sarcoidosis is like a pulled-back lung (Pakistan).

Chest - Interstitial Lung Disease

- The core concept review was useful (Thailand).
- Well designed, systematic approach (UK).
- Very well explained differences in terms of terminology (Pakistan).
- CT images used to illustrate the concepts taught were useful (Nigeria).
- Useful for my day to day practise and exams preparations (Nigeria).
- Valuable revision. The style of presentation was very helpful (UK).
- All aspects were useful, especially the basics (Sri Lanka).
- The images relevant to the radiological condition were useful (UAE).
- The detailed explanations were very useful (Malaysia).
- Description of patterns with specific pathologies was useful (Nigeria).
- Every aspect was useful (UK).
- The detailed theory revision with practical points was useful (Pakistan).
- Excellent teaching (UK).
- Way of presentation was useful (Pakistan).
- Clarity on teaching was useful (India).
- Different types of ILD were useful (UK).
