Testimonials

- The lecture was incredibly enjoyable and informative. As always, the explanation of the laryngeal and pharyngeal anatomy was clear and engaging, complemented by excellent CT and MRI imagery. A wide range of pathological conditions affecting the pharynx and larynx were discussed, with a particular focus on the differential diagnosis for each case. Despite the inherent complexity of the anatomy in this region, Dr. Khan's brilliant teaching style made it accessible. I would like to thank Dr. Khan for this outstanding effort and hope to see more high-quality lectures like this in the future (Jordan).
- Anatomy & radioanatomy studies and their pathology applications make abstract concepts memorable. Clear structure. Passionate presentation keeps us focused and motivated. I appreciate the interactive elements. Questions and discussions clear up confusion right away (France).
- Brilliant session, detailed case based & DICOM based approach to laryngeal anatomy making it much more easy to imagine and apply in practice and exam, many thanks to Dr. Khan and Team DKT (Egypt).
- Valuable revision. I liked the concept of 'Know your anatomy, make your Radiology' (UK).

- An excellent way to teach the anatomy by showing normal and pathological cases. Really grateful for this step by step teaching method (Iran).
