Testimonials

- First, I would like to congratulate Dr. Khan on being awarded the Gold Medal by the Royal College of Radiologists. This honour recognizes the significant effort Dr. Khan dedicates to continuing education - an outstanding contribution that we, as radiologists around the world, deeply appreciate. As always, the lecture was both highly important and engaging. This particular session, however, featured several "trick" cases that required extra attention; Yet, thanks to Dr. Khan's engaging teaching style, even complex topics became remarkably easy to grasp. Once again, thank you to Dr. Khan for the time and effort invested in preparing such an excellent presentation (Jordan).
- Very interesting variety of cases with very helpful feedback to candidates and very important take home messages, so thankful for time and efforts of Dr. Khan and Team DKT (Egypt).
- The cases were interesting and some seen for the first time. Dr. Khan is very good of accepting some of our answers without any negative reaction. Thank you! (UK).
- Today's lecture covered a diverse range of cases, and the explanations made the information very easy to understand (France).
- I liked Dr. Sami Khan's unique approach to cases, learning how to avoid satisfaction of search if you didn't reach the final diagnosis, and that you have to be a safe radiologist was excellent (Sudan).
- It was useful seeing unusual cases including Aunt Minnie, Erdheim Chester, which I hadn't seen before, also exam technique of narrowing differentials for arthropathies was useful (UK).
- A treasure trove of simplified information! (France).
- The Erdheim Chester case was very valuable, first time seeing it (Zimbabwe).

- The rare cases were great, particularly the satisfaction of search cases with multiple important findings (UK).
