- Total feedback received from 99 participants, from three different broadcasts

## GIT for FRCR Exam (Part - 1): Plain Abdomen and Oesophagus

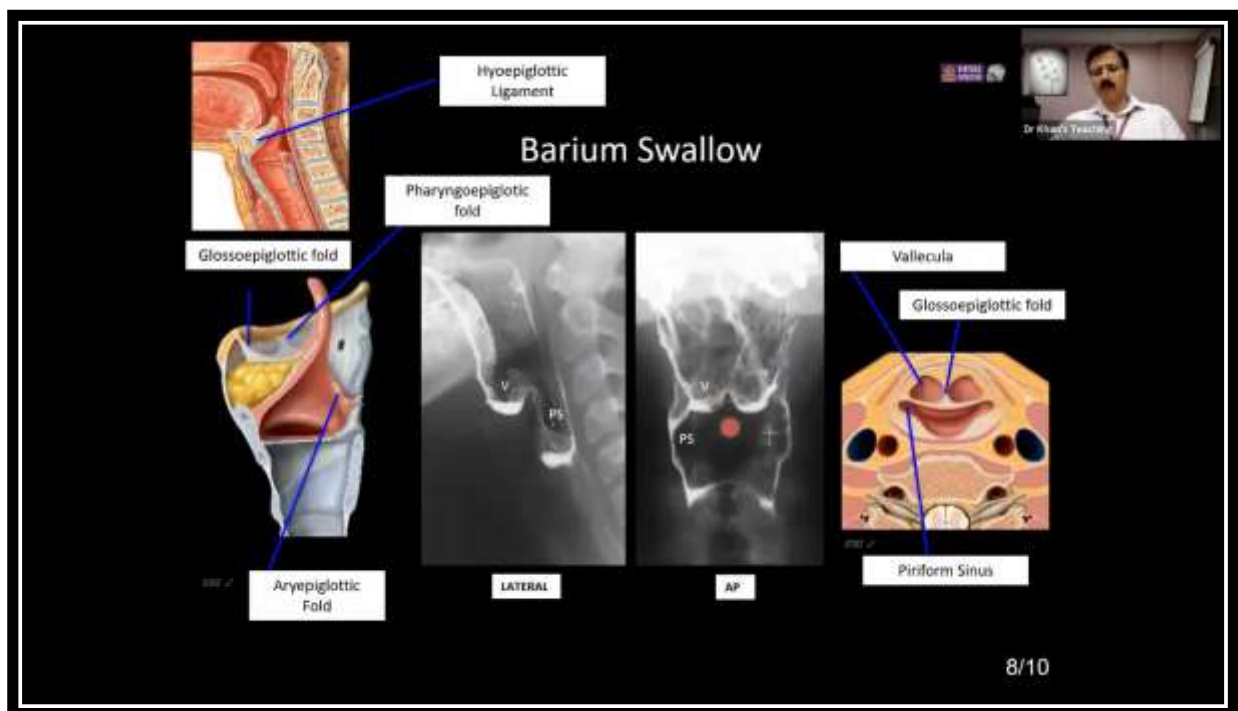

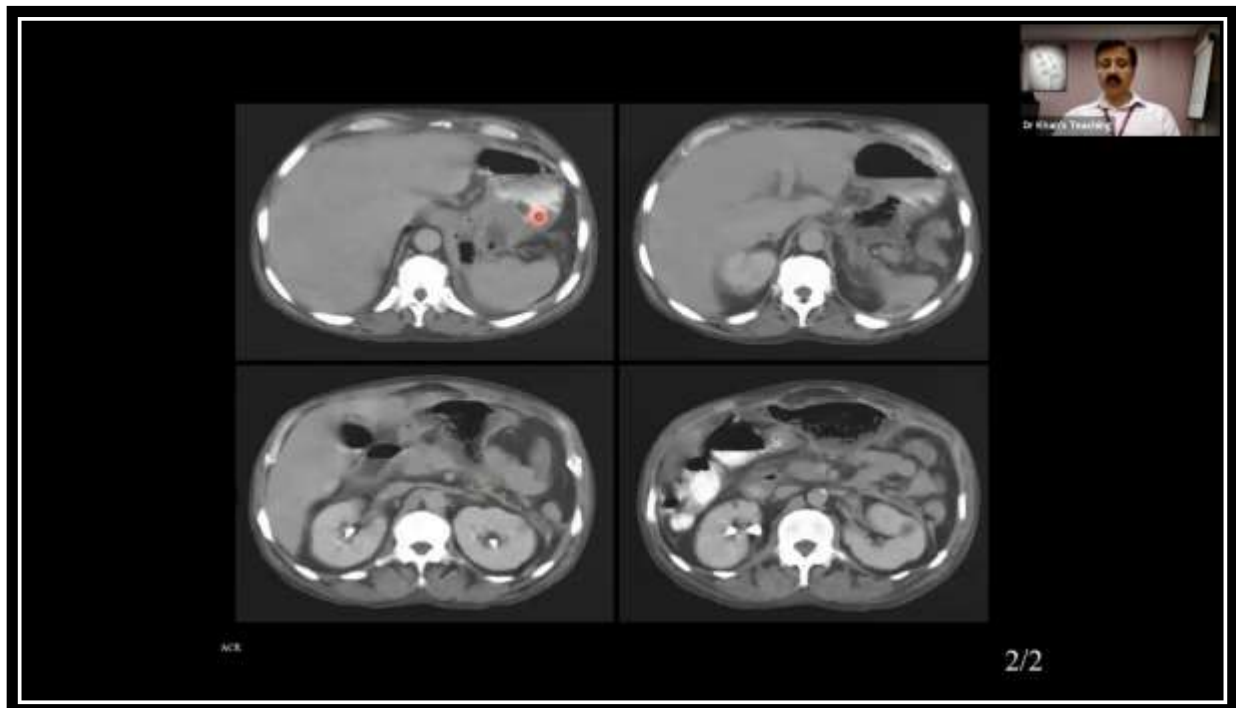

### Testimonials

- As always, the lecture was thoroughly enjoyable and highly informative. It featured numerous abdominal X-rays—the type examiners typically use to start an exam. Dr. Khan provided a comprehensive explanation covering topics such as large and small bowel obstruction and the various types of abdominal calcifications. There were also several "trick" abdominal images, with a strong focus on the differential diagnosis for each case. Regarding esophageal imaging, I particularly appreciated the detailed explanation of oesophageal tumors and their staging via CT scanning. Overall, I would like to thank Dr. Khan for his outstanding effort and for presenting all the topics in such an accessible, clear manner (Jordan).
- A broad, very interesting, and simplified lecture covering many cases of aerodigestive airway X-ray imaging. Interesting cases of MRI and CT scan in GI imaging (France).
- Viva style cases and detailed feedback following them, the use of Aunt Minnie's and structured teaching following cases to reinforce learning points were very helpful (UK).

- The teaching in between the cases to elaborate more was really helpful. Thank you so much! (South Africa).
- Brilliant session, varied cases with very important take home messages, many thanks Dr. Khan and Team DKT (Egypt).
- Detailed discussion case based approach and handling each and every aspect of exam viva format and detailed guidance (Pakistan).
- The session was very instructive with wide range of interesting cases (Bahrain).
