Testimonials

- As always, the lecture was highly engaging and valuable. Dr. Khan presented numerous interesting cases involving gastric and small bowel pathologies. A standout feature was the presentation of high-quality, fascinating fluoroscopic images—a modality that remains in use today yet often poses challenges for radiologists. There was a wide range of compelling cases, and what particularly caught my attention was the reinforcement of established concepts, such as those regarding Crohn's disease. There was also an excellent explanation of the pathogenesis of various small bowel disorders. Overall, it was a fantastic effort by Dr. Khan, delivered in a clear and accessible manner (Jordan).
- The cases discussed today are very important, and the explanation was perfect (France).
- Dr. Sami inspire us in every single session. Thank you very much for such brilliant sessions (Pakistan).
- Dr. Khan himself was the most useful aspect of the session (Malaysia).
- Great examples of the cases that would possibly be shown in the exam. Nice description of the findings (Bahrain).
- Thorough look at stomach/duodenal pathology was useful with a good explanation after giving candidates time to present (UK).
