- Total duration: 3 hours (each session broadcasted thrice during the week)
- Total feedback received from 85 participants, from three different broadcasts

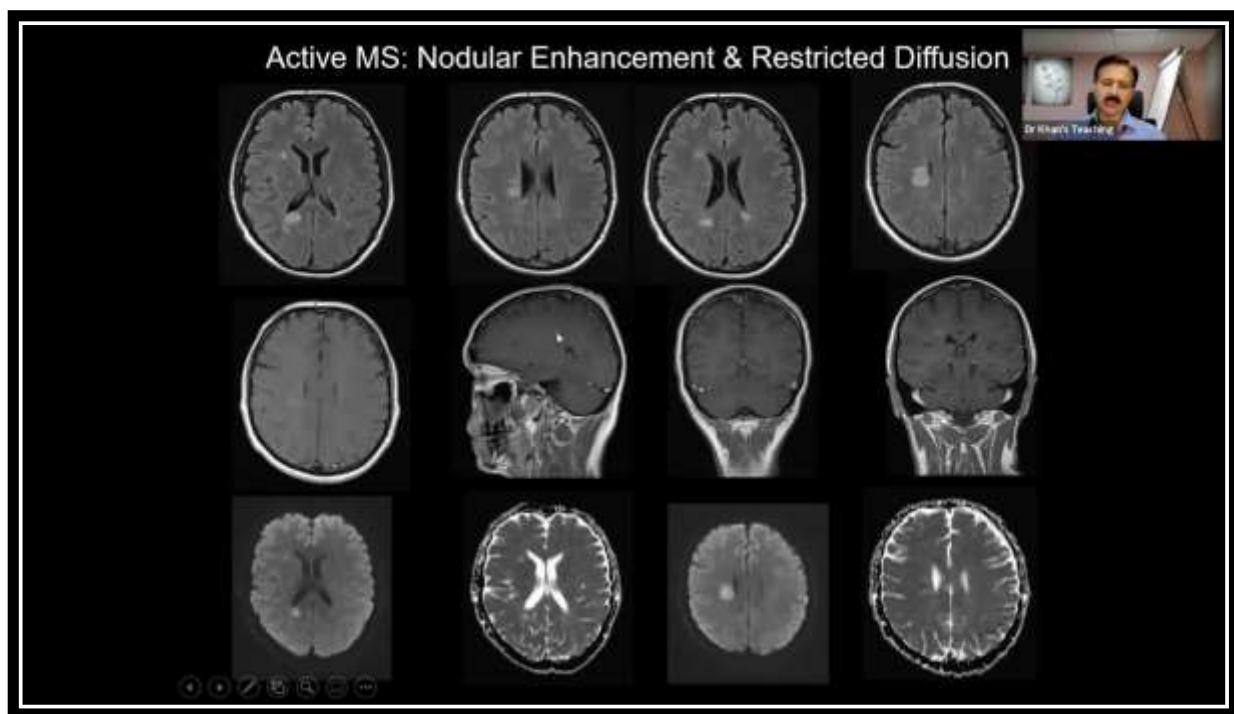

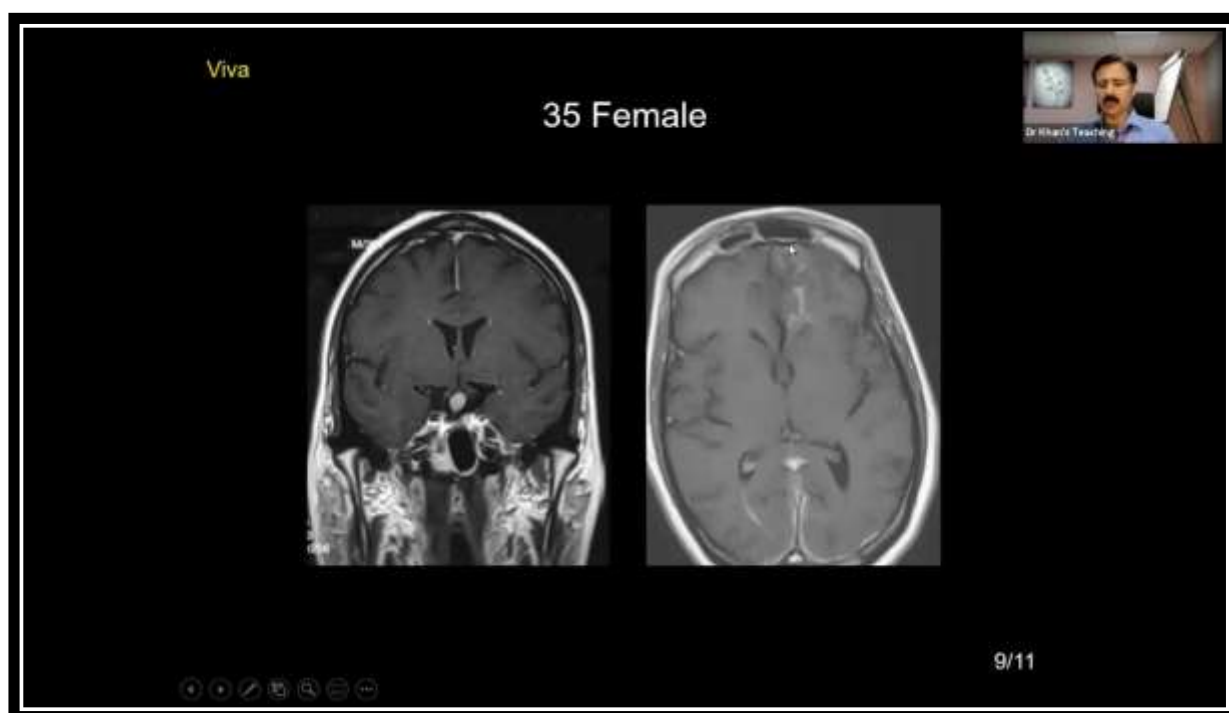

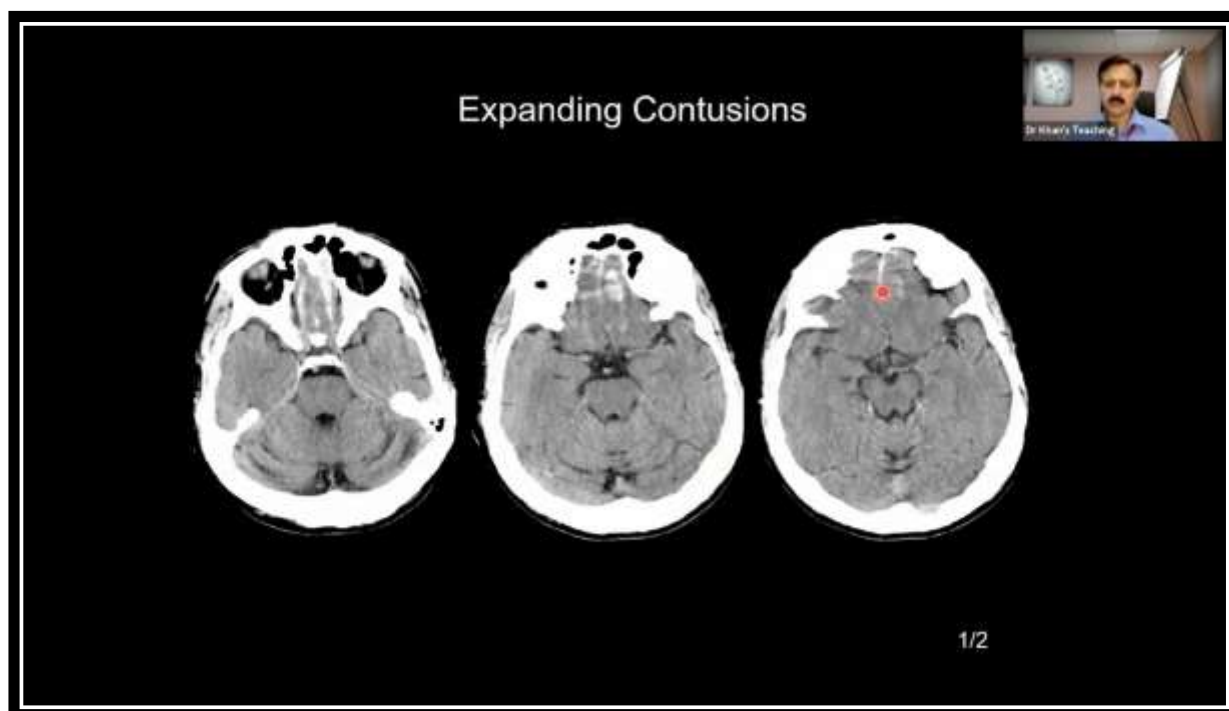

Testimonials

- I loved the way that Dr. Khan pointed out the subtle lesions that we might miss and clearly explained each case (Thailand).
- Thank you for concentrating on the differential diagnosis. Very informative and scientific (Egypt).
- The lecture was incredibly enjoyable and informative. Despite the complexity and rarity of some of the topics in clinical practice, Dr. Khan's explanation was—as always—exceptionally clear and accessible. There was a detailed overview of white matter lesions, with a focus on how to differentiate between conditions such as Multiple Sclerosis and ADEM, alongside other equally important topics. Regarding brain trauma, the material was presented very clearly, emphasizing the potential complications of each injury, and included a detailed explanation of the differential diagnosis for each specific case. Many thanks to Dr. Khan for this outstanding effort (Jordan).
- Very wonderful opportunity to be able to get such compilation of cases and explanations (Nepal).
- Difficult topic explains in a very simple way. Thank you very much (Pakistan).
- It was a very good session (Sri Lanka).

- Good trauma cases were useful (India).
- Teaching session and case description was useful (Nigeria).
- Grateful for lecture and teaching (UAE).
- Obviously, Awesome! (Thailand).
- Very helpful and excellent session. Thank you, Dr. Khan, for your efforts (Jordan).
- Excellent, brilliant teaching (Sudan).
