Testimonials

- An excellent teaching session like always with a lot of diverse cases and detailed explanation on each case (Iran).
- The lecture was incredibly enjoyable and informative. Dr. Khan provided a detailed and comprehensive explanation of various spinal pathologies—ranging from spinal tumours and inflammatory diseases to rare conditions like sarcoidosis and lymphoma, among other equally important topics. The presentation was supported by numerous MRI and CT scans of the spine, with a focus on the differential diagnosis of each case and how to distinguish between the different lesions. It was truly an outstanding effort by Dr. Khan; many thanks to him once again (Jordan).
- The MRI teaching was particularly useful, as I don't do a lot of this where I am (South Africa).
- Listening to the lectures again and again I always learn new. Thank you sir such and amazing platform for us (Pakistan).
- The excellent radiological anatomy was most useful (Sudan).
