- Total duration: 2 hours (each session broadcasted thrice during the week)
- Total feedback received from 87 participants, from three different broadcasts

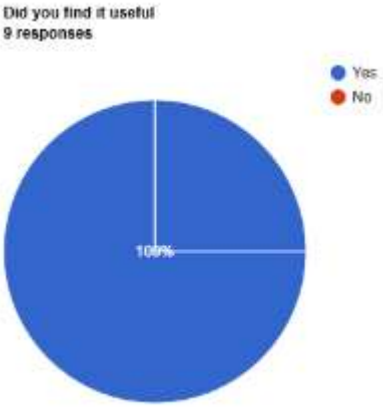

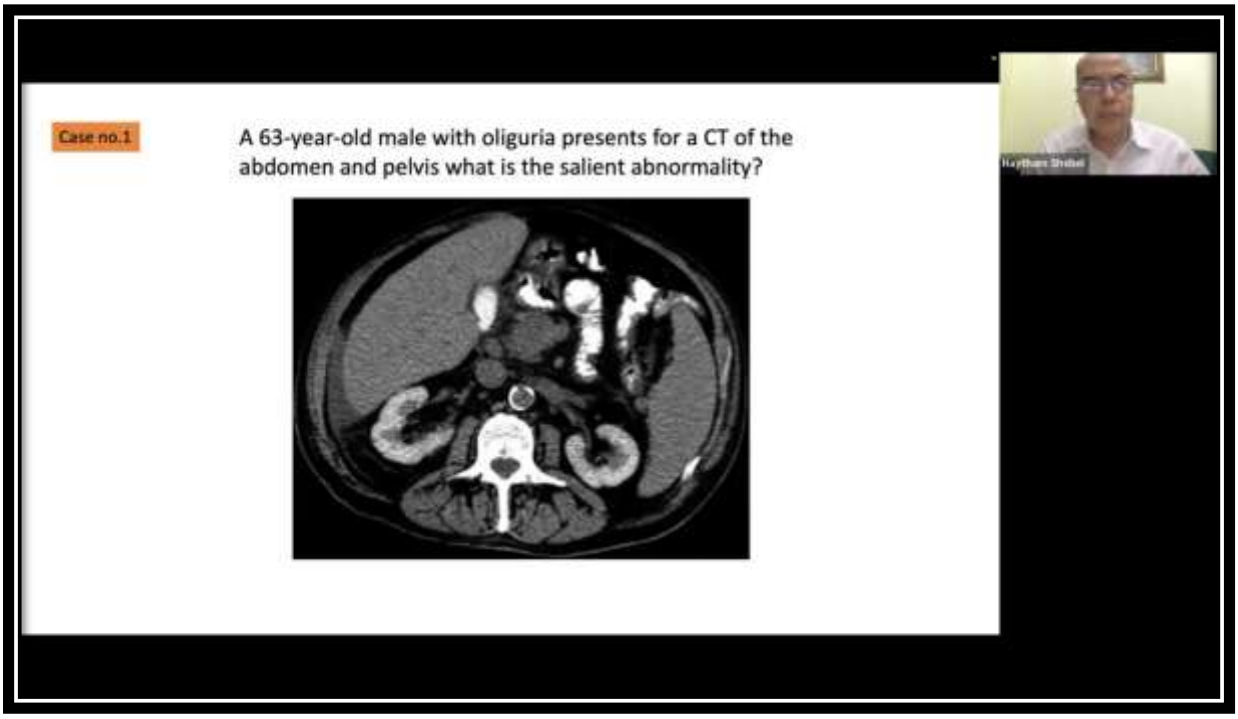

Testimonials

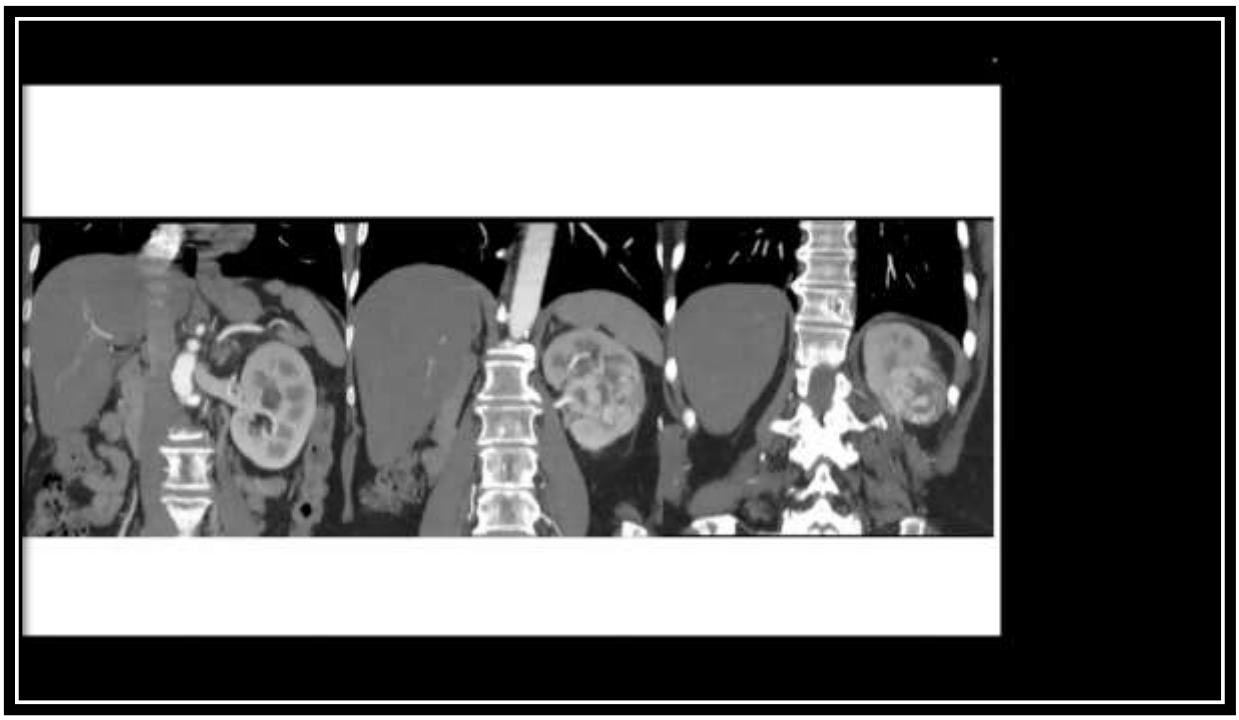

- The lecture was both highly enjoyable and informative. Dr. Haytham Shebel presented a number of fascinating cases involving the urogenital system; what truly set this lecture apart was his detailed explanation of the pathophysiology behind each case, linking it to the corresponding radiological patterns and the methods for distinguishing between them. There were several tricky cases that really required some careful thought. Overall, many thanks to Dr. Haytham for such a brilliant presentation, and to Dr. Khan for hosting such an elite group of radiologists (Jordan).
- Excellent session, every case has so important take home message/s, beyond excellent and really talented teacher with so simple and to the point way of explanation. Many thanks great teacher and team DKT (Egypt).
- The good cases with teaching points were useful - tutor was very knowledgeable (UK).
- The detailed explanation and presentation style was useful (Nigeria).
