Testimonials

- To begin with, I would like to note that this lecture serves as a fundamental foundation for any general radiologist. Most of the radiological techniques presented by Dr. Muhammad are essential—ones that every radiologist should be familiar with. The intricacies of interventional radiology can often prove challenging for those preparing for examinations, largely due to limited practical exposure to this subspecialty. However, thanks to the excellent and clear explanations provided by Dr. Muhammad Hanif—who covered a comprehensive range of routine clinical scenarios encountered in daily practice—we gained valuable insight into how these cases are managed through the lens of interventional radiology, a field that represents a modern, progressive leap forward in the science of radiology. In closing, I would like to thank Dr. Khan and his guest for their outstanding effort (Jordan).
